

LumiBright™ Products

Die Placement Chart

The following chart displays our standard LED board configurations.

- All die are nominally 1.07 mm on a side (42 mil)
- Configurations are valid for LumiBright Light Engines, Tapers, Projectors, Fiber Coupled devices and LumiBright Boards.
- Individual product sheets will indicate the number of wavelengths and total number of die available per product.

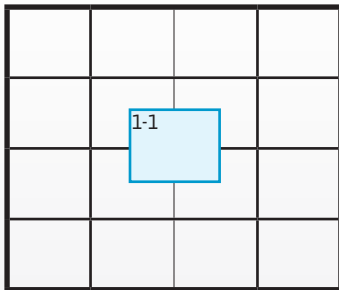

DIE PLACEMENT CHART

(For multi-color products please contact an applications engineer.)

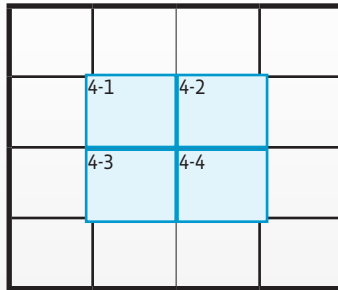

DIRECTIONS:

Refer to the wavelength chart and place the desired bin codes in the appropriate positions on the chart below. The dashed numbers are for reference in communication.

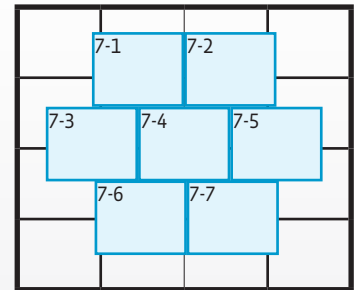

1 DIE

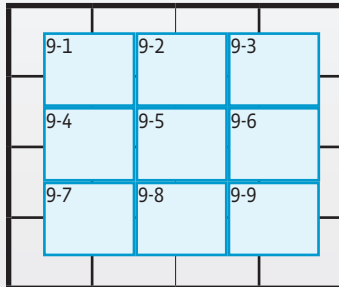

4 DIE

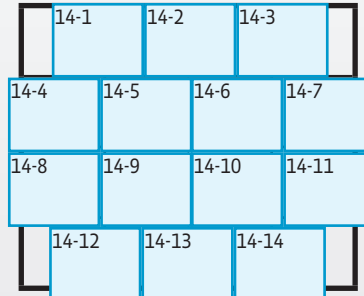

7 DIE

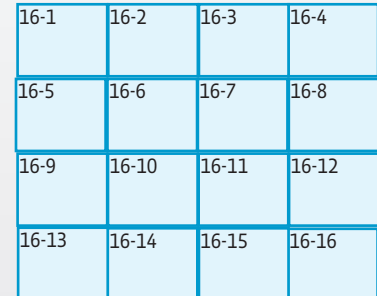

9 DIE

14 DIE

16 DIE

* Other configurations available upon request
